Classic Blue
19-4052

1

brings a sense of peace and tranquility to the human spirit, offering refuge

2

Aiding concentration and bringing laser like clarity, Classic Blue recenters our thoughts

3

Associated with the return of another day, this universal favorite is comfortably embraced.

"We are living in a time that requires trust and faith. It is this kind of constancy and confidence that is expressed by PANTONE 19-4052 Classic Blue, a solid and dependable blue hue we can always rely on. Imbued with a deep resonance, PANTONE 19-4052 Classic Blue provides an anchoring foundation. A boundless blue evocative of the vast and infinite evening sky, PANTONE 19-4052 Classic Blue encourages us to look beyond the obvious to expand our thinking; challenging us to think more deeply, increase our perspective and open the flow of communication."

- Leatrice Eiseman, Executive Director of The Pantone Color Institute

engineered environment

In the engineered environment, design and science become symbiotic to enhance or create new products to use in designed spaces. Sustainability is the baseline for the engineered environment trend and using recycled or reclaimed materials will be the highlight of this trend.

REPURPOSED WOOD CONFERENCE TABLE

WOOD SLAB USED ON RECEPTION AREA.

Using materials that reflect nature is one of the core elements of the engineered environment design trend. Choose materials that mimic nature in color and texture.

Colors: Yellow gold, moss green, crimson and blue. Color transparencies and overlapping color.

Materials: Should reflect their engineered nature. Recycled plastics, repurposed woods and metals, resins, and terrazzo.

Patterns: Biomorphic, amoeba-like, patterns that mimic nature, and digital interpretations of nature.

BIOMORPHIC CARPET TILE

“

"An ensemble of metal accents, used throughout a room is in, and will always be a timeless and tasteful way to create balance and definition in an environment." - Keita Turner of Keita Turner Design

Modern metals

Metals will be amongst the top 2020 design trends. Because of its versatility, metals will be seen across design styles. Metals can be incorporated into decor through large elements such as wallpaper and furniture or with small decorative pieces such as planters.

Mixing and matching metallic finishes will be the standard choice in implementing the modern metal trend. Add a hint of glamour by introducing bronze, gold, rose gold and chrome metallic elements, details or accessories into spaces.

METALLIC PLANTERS

Easy to be adapted to any interior style, **metals bring brightness and luminosity** to the decoration in different rooms, from modern to classic all the way to vintage style. Use metal planters to accentuate current design styles and to combine with other design trends such as Biophilic Design.

biophilic design

Humans are calmed by the sight of greenery in the form of live plants and living walls, access to views of natural settings, and tactile organic materials such as wood & stone.

Leveraging access to natural light and **providing access to views of the outdoors improves employee well being and energy levels.**

"Commercial office furnishings featuring natural soft touch materials, including veneer and cork, will continue to be popular for open plan and private office spaces." - Benjamin Pardo, Design Director, Knoll

DESIGNING TO RECONNECT WITH NATURE

Materials: Finishes appear cloud-like and layered such as soft touch materials like veneer and cork.

Colors: off-white, khaki, brown, gold, blue and jade green.

humans and nature

Use materials that mimic the outdoors.

Wood, stone and other **natural materials** give the feeling of being closer to nature, increases productivity, sense of well-being, and reduces absenteeism

METALLIC PLANTERS

NATURAL AUTUMNAL, EARTHY, TACTILE VIBES ARE TIED TO NATURE & WELLBEING.

OFFICE DESIGN & MINDFULNESS

Mindfulness refers to the basic human ability to be fully present and aware of where we are and what we are doing and not being overwhelmed by what is going on around us. **Incorporating mindfulness into the workplace has a positive impact on the work environment and increases creativity and productivity.**

Although there are many ways to incorporate mindfulness into the workplace, here are a few ways to implement it:

- Maximize access to daylight
- Create partitions to block sound and create a sense of privacy
- Use plants, they improve air quality, increase oxygen levels and reduce stress
- Design spaces that are calming by using colors and lighting to set a calming mood
- Mix natural materials like wood, natural fibers and green walls

“

Variety is, in fact, one of the most important trends in office design today, with communal tables, quiet pods, brainstorm islands, formal and informal meeting rooms replacing dedicated desks, explains Lily Stanger, Design Lead, Mindspace

benefits of mindfulness

- Reduces Anxiety
- Increases Happiness
- Increases Creativity
- Improves Productivity
- Boosts Employee Morale

type of spaces

- Informal Meeting Rooms
- Quiet Rooms
- Sound Proof Phone Booths
- Cubby Holes
- Themed Meeting Rooms
- Distraction Free Corners

Velvet is here to stay

Velvet is usually associated with glam and luxe styles, but it is very versatile and can be used in modern, rustic, and even minimalistic design styles. **Velvet is the perfect blend of luxury and comfort.** Use velvet upholstered furniture to make a statement in employee gathering spaces.

“

"Velvet in unexpected colors give a sense of luxury and warmth, especially when combined with silks and mixed metallic hues," Tara Dudley - Interior Designer
